HERITAGE ALLOY
Refined Copper. Trusted Ownership

ABOUT HERITAGE ALLOY

Heritage Alloy is a specialised supplier of 99.9%+ high purity copper bars and rounds, committed to producing copper pieces that meet the highest standards of quality, authenticity, and reliability.

Our products are manufactured using Electrolytic Grade Copper through controlled process to ensure consistent purity, structural integrity, and accurate weight. Every piece reflects our commitment to preserving copper's intrinsic value in its most stable and trusted physical form.

Through strict quality control procedures and precision manufacturing systems aligned with applicable ASTM / IS standards, we deliver copper bars trusted by investors, collectors, and industries seeking tangible and enduring metal assets.

Each copper piece represents purity you can verify and value you can hold.

WHY CHOOSE OUR COPPER BARS ?

99.9%+ Fine Electrolytic Copper

Manufactured using high purity Electrolytic Grade Copper to ensure superior metal integrity, conductivity, and structural consistency.

Industry Standard Compliance

Manufactured in alignment with applicable ASTM / IS standard refining, ensuring reliability for domestic and export requirements.

Verified Quality Assurance

Every copper piece undergoes inspection to ensure consistent purity, finish, and dimensional accuracy.

Distinct Product Range

Available in circular round, standard bar, premium mirror finish bar, and personalised formats.

Personalisation Capability

Custom engraved copper bars available for commemorative, corporate, or identity-based applications while maintaining the same 99.9%+ purity standards.

COPPER BAR COLLECTION

Our copper collection is from 99.9%+ fine copper (999+ purity) using Electrolytic Grade Copper, preserving authenticity, structural integrity, and lasting value.

500g Copper Round

Designed in a timeless circular form, the 500g Copper Round represents continuity, permanence, and balance. Its distinct shape makes it ideal for ownership, collection, and long term value preservation.
